It will require but few words, and I cheerfully offer it. The deficiency and inaccuracy of the literature, in our own language, on the origin and development of the tooth-germ and its associate parts, render it almost worthless, as compared with the more recent researches of foreign investigators. The only exception I would make is that of the valuable work of Professor Tomes. If anything more is required, I refer the reader to the following pages, which, so far as I have been able to do justice to the authors, will be their own apology. Some of you will remember that, nearly twenty years ago, one of the authors of this memoir, Dr. Magitot, in connection with Dr. Oh. Kobin, wrote a treatise entitled, The Genesis and Development of the Dental Follicle) to the Epoch of the Eruption of the Teeth, a large portion of which was translated for the Dental Cosmos. While the writers of that treatise gave a detailed and elaborate account of the development of the jaws and their anatomical constituents, that portion devoted to the origin and formation of the dental follicle was in many respects incomplete, and in some particulars erroneous.
