Several other investigations have been undertaken in connection with the development of new lines of electrical instruments, and with improvements in existing types. Upon the renewal of the contracts for supplying light and power to the departments, the Bureau was requested by the various departments, at the suggestion of the Secretary of the Treasury, to test the electric meters measuring the power supplied to the various Government buildings in the District of Columbia. The tests made during the year included 27 ammeters, 20 voltmeters, 17 wattmeters, 94 watthour meters, 3 power-factor meters, 15 current transformers, 20 insulation tests with high voltage, 2 arc lamps, 33 electric fans, 19 dry cells, and 4 miscellaneous tests--a total of 209 pieces. ELECTRICAL RESISTIVITY OF COPPER. The results of the investigation to determine the electrical conductivity and temperature coefficient of average commercial highgrade copper...
