Rada, Claude Ghaoui, This volume asserts that multimedia plays an increasingly important role in training and development for high-technology medical techniques. It examines a broad range of methods for incorporating computer-based multimedia packages into the world of medicine. Collected together as a result of the "Multimedia '93" conference on "Multimedia in Medicine", coverage includes a paper on the award-winning project "Understanding Cervical Cancer and the National Screening Programme", and application of the THESEUS hypermedia model.
