A classic of 18th-century thought, Schillers treatise on the role of art in society ranks among German philosophys most profound works. An important contribution to the history of ideas, it employs a political analysis of contemporary society and of the French Revolution, in particular to define the relationship between beauty and art. Schillers proposal of art as fundamental to the development of society and the individual remains an influential concept, and this volume offers his philosophys clearest, most relevant expression.
