RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 48 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1879 edition. Excerpt: . . . Add for work, etc. , --15, 000 125, 889 15 per cent, for engineering, quicksand, etc. , --18, 883 144, 772 10, 000 for land drainage, 10. 000 154, 772 i1 The estimate formerly contemplated involved an expenditure of 550, 000, that is sewers to include surface and storm-water, with outlet at Andrews pond instead of below Hanover. The lessened cost of labor since the former estimate is probably offset by the difference in outlet. NEW BRITAIN. Like most of the older cities constructed before the value of the services of the sanitary engineer was appreciated, many artificial sources of water, air, and soil pollution detrimental to health have been caused as a busy, thriving, manufacturing city was developed from the straggling, irregularly arranged collection of buildings that first marked the site. Other than sanitary considerations generally control the location of cities and villages. Some natural advantages for manufacture or commerce control the selection usually, the higher levels are chosen for the construction of dwellings, the low lands used for shops, stores, and factories. In process of time, however, as the necessity for tenements near the centers of work and trade increases, the low lands are utilized for buildings; swamps and hollows that have been filled in with refuse and garbage are used also as sites, and dwelling houses are constructed upon this reeking, fermenting, and in some cases excrement-sodden foundation. The natural slopes and levels receive no attention, nor...
