Excerpt: .off, while others still adhere to the leaves. From galls kept in a room the flies appeared from October to December.--G. L. Mayr. The inquilines and parasites of this species, given by Mayr, are as follows: .Synergus pallicornis, H., in the spring of the second year; Syntomaspis lazulina, Fi2 rst., Mayr and Haimhofen bred over two hundred specimens of this species, mostly in May and June of the second year; Callimome abdominalis, Boh., in March of the second year; and C. regius, Nees, from March to June of the second year. Mayr also notices an interesting case in which he collected a specimen of this gall on July 18th, then quite immature, which produced Synergus pallicornis in the following spring.--E. A. Fitch. Easter at Wickerslack. By J. H. THRELFALL, Esq. ON Friday, the 14th of April, Mr. J. B. Hodgkinson and myself went to...
